

Create NodeRed Service:

The screenshot displays the IBM Cloud Developer console interface. The main heading is "Node RED YANWY 2022-11-18" with an "Add tags" link. Below this, there are three main sections: "Details", "Deployment Automation", and "Getting started quickly".

Details: This section contains a table with the following information:

Field	Value
App URL	You must deploy your app first
Source	Download code
Resource group	Default
Deployment target	You must deploy your app first
Created	18/11/2022

Services: This section shows the "Cloudant" service with links to "Open dashboard", "Documentation", and "API reference". There are also buttons for "Connect existing services" and "Create service".

Deployment Automation: This section has a heading "Configure Continuous Delivery" and a message: "Continuous Delivery is not enabled for this app. Enable Continuous Delivery to automate builds, tests, and deployments through Delivery Pipeline, GitLab, and more." There is a "Deploy your app" button.

Getting started quickly: This section provides a list of steps for configuring the app:

1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more.](#)
2. If you want to view the code before your app is deployed, click **Download code** to obtain the .zip file.
3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.
5. If you make any changes to your app, be sure to **deploy** it again.

The interface also includes a search bar at the top, a navigation menu on the left, and a user profile on the right.
